

○○○ STREET SERIES - HIGH PERFORMANCE BRAKE CALIPERS

With the highest level of engineering comes the new 'Street Series' High Performance Brake Calipers. The 'Street Series' Brake Calipers are produced from 6068-T6 Aluminium Alloy which is Split Forged before being finished in a slick Black High Temperature Braking Paint.

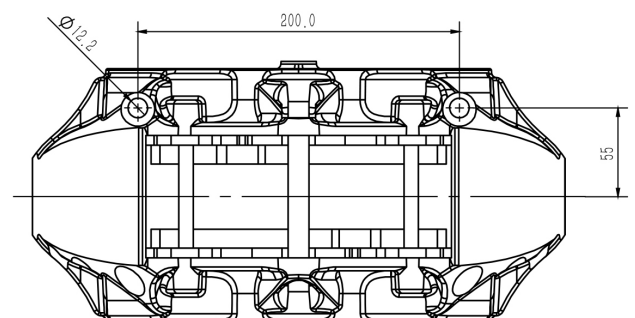

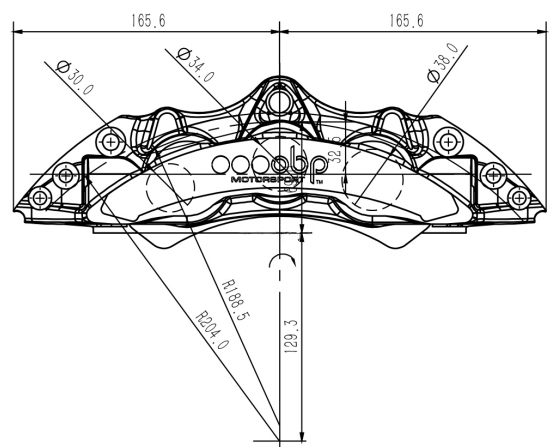

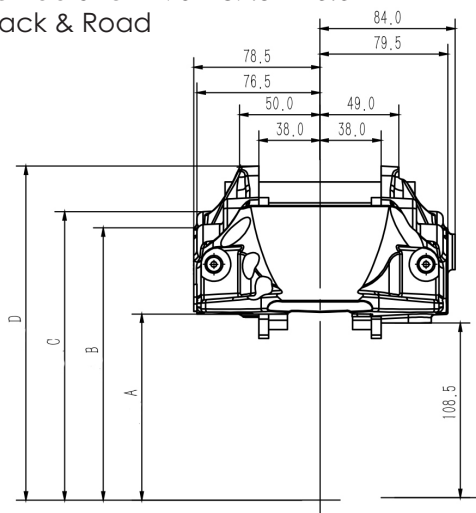

The Street performance versions are suitable for everyday use, track days and club racing when you can gain a sensitive braking feel with optimal heat dissipation performance and improved stability under braking.

PART NO.	POTS	DISC SIZES	DISC THICKNESS	PISTON SIZE	WEIGHT
OBP-SS-6	6	355-380 mm	32 mm	28 x 34 x 36 mm	7.92kg (Pair)

- Produced by Forging & CNC Machining
- Aviation Aluminium Alloy Body
- Aluminium Alloy Pistons
- 52.41 cm2 Piston Area (28x34x36mm)
- 7.92kg Weight (Per Pair)
- 334 x 97.5 x 158mm Parameters
- High Temperature Black Coating
- Suits 18,19 & 20" Rims
- Suits 355-378 x 32mm Discs
- Common Brake Pad Size - 190 x 87.5 x 16.6mm
- Designed for Track & Road

Disc	Size A	Size B	Size C	Size D
355x32 mm	114.10	167.60	177.70	204.50
378x32 mm	125.60	179.10	189.20	217.00

Brake Pads

Utilises the same brake pads as
