

Digital Tyre Pressure Gauge

CLASS OF ACCURACY : 0,1%

PRESSURE RANGE : 0-5 BAR/72 PSI

Digital tyre pressure gauge HIPREMA4 is the fourth version of this instrument that has become the most used in all categories of motorsport as far as measurement of tyre pressures. It has a new design, re-engineered electronics, new backlit display, ambient light sensor, the possibility to save Time and Date at each session and many new other functions that can be activated from the menu available in 3 languages.

It is possible to use Hiprema4 in two modes:

NORMAL MODE

It is possible to measure and adjust the tyre pressures without saving them.

MEMORY MODE

Pressing MEM button, it is possible to save in sequence COLD and HOT tyre pressures and to have the **pressure changes** had during the session directly on the display. For each session, it is possible to save not only pressures but also **Date, Time and Ambient temperature**.

ACCURACY

Maximum pressure error at full scale: 0,1%

RELIABILITY

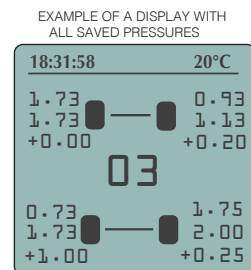

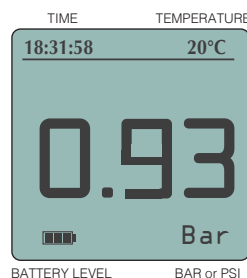

This tyre pressure gauge does not require calibration; whenever you power ON the instrument, the internal microprocessor automatically performs the procedure in order to reach a reliable measure at 100%.

EASE OF USE

You can save the tyres pressure simply by pressing the MEM button. The display show automatically which tyre to measure and store.

Part Number : HPM4

COLD tyre pressures
HOT tyre pressures
Pressures difference

PRESSURE SHOOT® FUNCTION

Setting the **PRESSURE SHOOT FUNCTION** the pressure gauge can save the hot tyre pressure automatically !!

TECHNICAL FEATURES

Pressure range: 0 - 5 Bar/72 PSI

Class of accuracy: 0,1

Maximum pressure error at full scale: 0,1%

It is not required calibration

Backlight display

Ambient light sensor

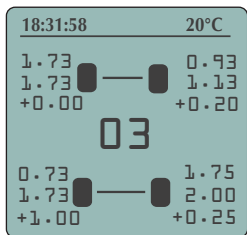

IP55 grade protection

Auto power OFF

Possibility to save 50 sessions

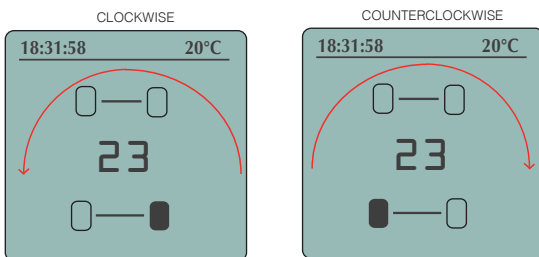

NEW FEATURES

- Date - Time - Ambient Temperature saved at each session
It is important to have Date, Time and Ambient Temperature saved for each session.
- It measure differences between COLD and HOT tyre pressures

COLD tyre pressures
HOT tyre pressures
Pressures difference

- Pressure Shoot function - Automatically save hot tyre pressures
Can be activated or deactivated from the menu
- Clockwise or Counterclockwise
According to the sense of rotation of the track, it is possible to choose the favourite rotation for saving pressure .

- Languages menu ITA - ENG - FRA
It is possible to set the menu between Italian, French and English languages

Car Mode

Ambient light sensor

Backlight display
