

Tyre Probe Sensor Version

## Multifunctions Instrument Tyre Pressure Gauge & Pyrometer

Which are the most important parameters to measure in the tyres?

### PRESSURE AND TEMPERATURE

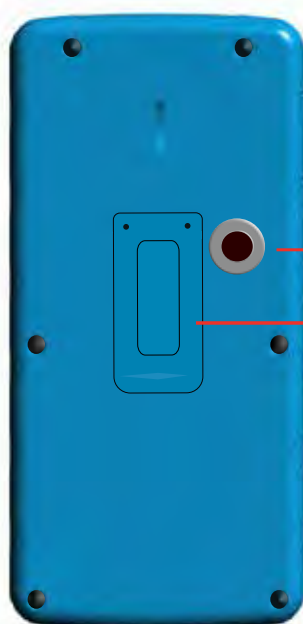

We have made an instrument that allows to measure tyre pressures and temperatures.

It combines all HIPREMA 4' and DIGITAL PYROMETER's features in order to have a complete instrument for having the evaluation of tyre pressures and temperatures.

### TWO TEMPERATURE SENSOR MODELS AVAILABLE

- ▶ **TYRE PROBE** sensor version that allows to penetrate the tread in a simple and easy way without damaging it.
- ▶ **TYRE INFRARED SENSOR** which is placed behind the instrument and allows to measure the temperature with extreme accuracy.

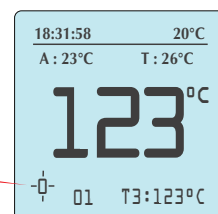

Infrared Sensor Version

Infrared sensor for tyre temperature

Removable belt clip

IN THE INFRARED SENSOR VERSION, THERE IS A VIEWFINDER THAT INDICATES THE EXACT POINT THAT YOU ARE MEASURING

Part number with Tyre Probe : HPM4+PYR2

Part Number with Infrared Sensor: HPM4+PYR2-IR

It is possible to switch from  
**TEMPERATURE** mode to **PRESSURE**  
mode and vice versa simply by pressing  
the **MODE** button

**PRESSURE SHOOT® FUNCTION**

Setting the **PRESSURE SHOOT FUNCTION** the pressure gauge can save the hot tyre pressure automatically !!

Time	18:31:58	20°C	Amb. temperature
A : AIR temperature	A : 23°C	T : 26°C	T: TRACK temperature
<b>123°C</b>			
IR sensor finder	-0- 01	T3:123°C	T3 : 123°C -- Last saved temp. value
01 : Numero sessione			

EXAMPLE OF A DISPLAY WITH ALL SAVED PRESSURES

18:31:58	20°C	
1.73	0.93	COLD tyre pressures
1.73	1.13	HOT tyre pressures
+0.00	+0.20	Pressure difference
<b>03</b>		
0.73	1.75	
1.73	2.00	
+1.00	+0.25	

- Languages menu ITA - ENG - FRA  
It is possible to set the menu between Italian, French and English languages

**Removable belt clip**

Part number with Tyre Probe : HPM4+PYR2
