

Pressure Gauge Mode

Stopwatch Mode

- ▶ 4 Drivers
- ▶ 9 Split times for each drivers
- ▶ Best Lap
- ▶ Difference between current Lap and Best lap

Multifunction Instrument

Digital Tyre Pressure Gauge & Stopwatch

We have combined in one instrument **DIGITAL TYRE PRESSURE** and **STOPWATCH**

They are the most used instruments by mechanics during a race. The pressure gauge is used for pressures and Stopwatch for timing simultaneously until 4 drivers with 9 split times for each driver.

It is the first and unique instrument that joins together these two instruments.

It is possible to switch from **PRESSURE** mode to **STOPWATCH** mode and vice versa simply by pressing the **MODE** button

It combines all HIPREMA 4' and STOPWATCH's features

Removable belt clip

Part number : HPM4+STW

Multifunction Tools

- ▶ Tyre Pressure Gauge
- ▶ Tyre Pyrometer
- ▶ Stopwatch

Stopwatch Mode

The most complete instrument in the Motorsport world

It is possible to time 4 different drivers with 9 split times for each drivers

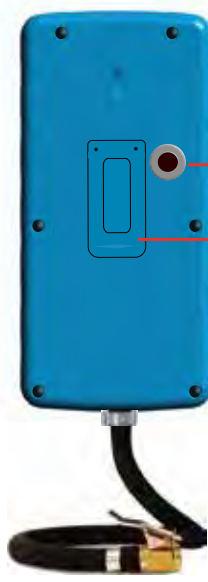

It measures and saves tyre pressures

It measures and saves the temperature of the tyres in three different characteristic points of the tread:

EXTERNAL - INTERMEDIATELY - EXTERNAL

It measures and saves AIR and TRACK temperature for each session, save TIME and DATE

Tyre Pyrometer Mode

Infrared sensor for tyre temperature

Removable belt clip

Tyre Pressure Gauge Mode

Two temperature sensor models available

- ▶ Tyre probe sensor
- ▶ Infrared sensor

Part number with Tyre Probe : HPM4+PYR2+STW

Part number with Infrared Sensor : HPM4+PYR2+STW-IR
